- Project 1: Flower Cage House (Bangkok)

1. FLOWER CAGE HOUSE

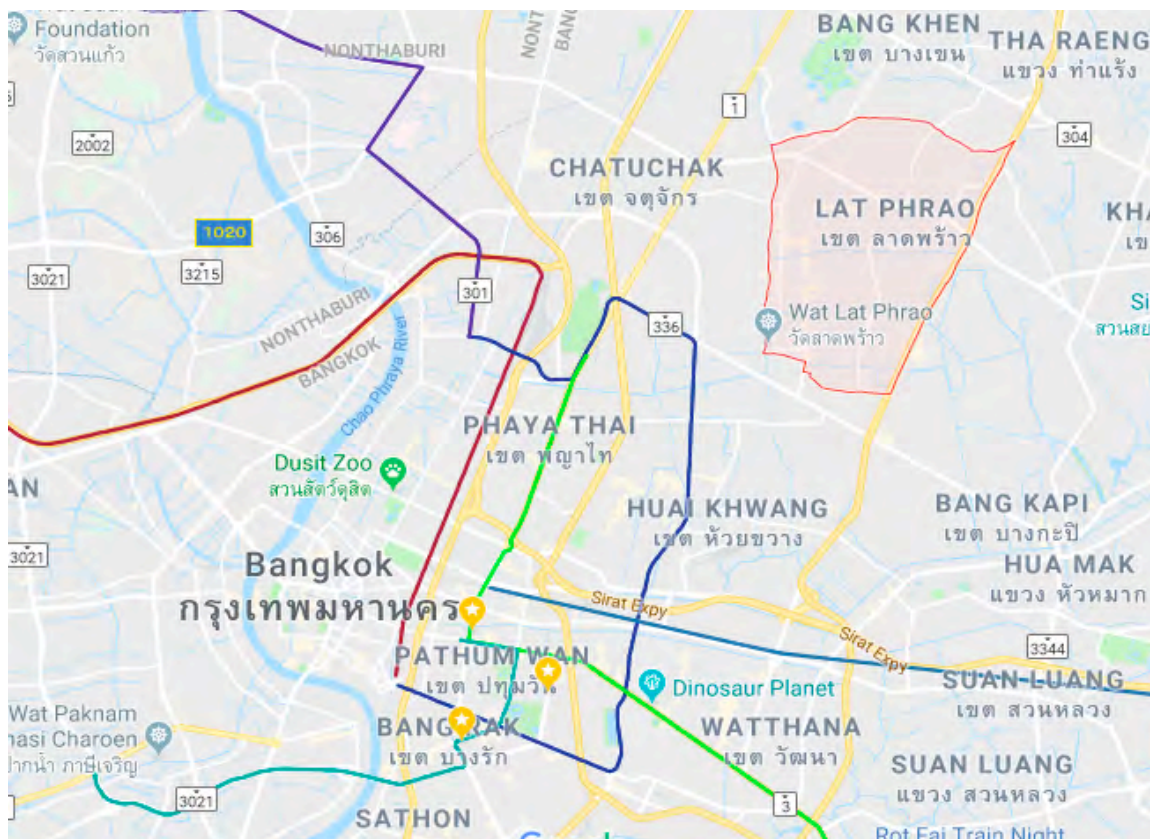

Project Overview

Renovation of a 10-year-old private home whereby the owner wanted to create more interior space. On the ground floor, at the main living area, most of solid walls were torn down and steel frame glazing panels constructed, allowing for more natural light to flood in. The garage area was improved by removing an old pole structure and rebuilding a new steel structure over it to create a multipurpose area on the 2nd floor. The area beneath was brought to life by creating fishponds. The iron stairs above the pond leads to a multi-purpose area, acting as the area's main design feature, while the upstairs interior was collapsed and transformed into a penthouse.

Project Details

1. **Type of Business:** Private home
2. **Open Date:** 2017
3. **Size:** Internal area of 300 sq.m.
4. **Location:** Ladprao, Bangkok, Thailand
5. **Architect:** Phongphat Ueasangkhomset and Parnduangjai Roojnowate from Anonym Studio;
