1. Il Mannarino

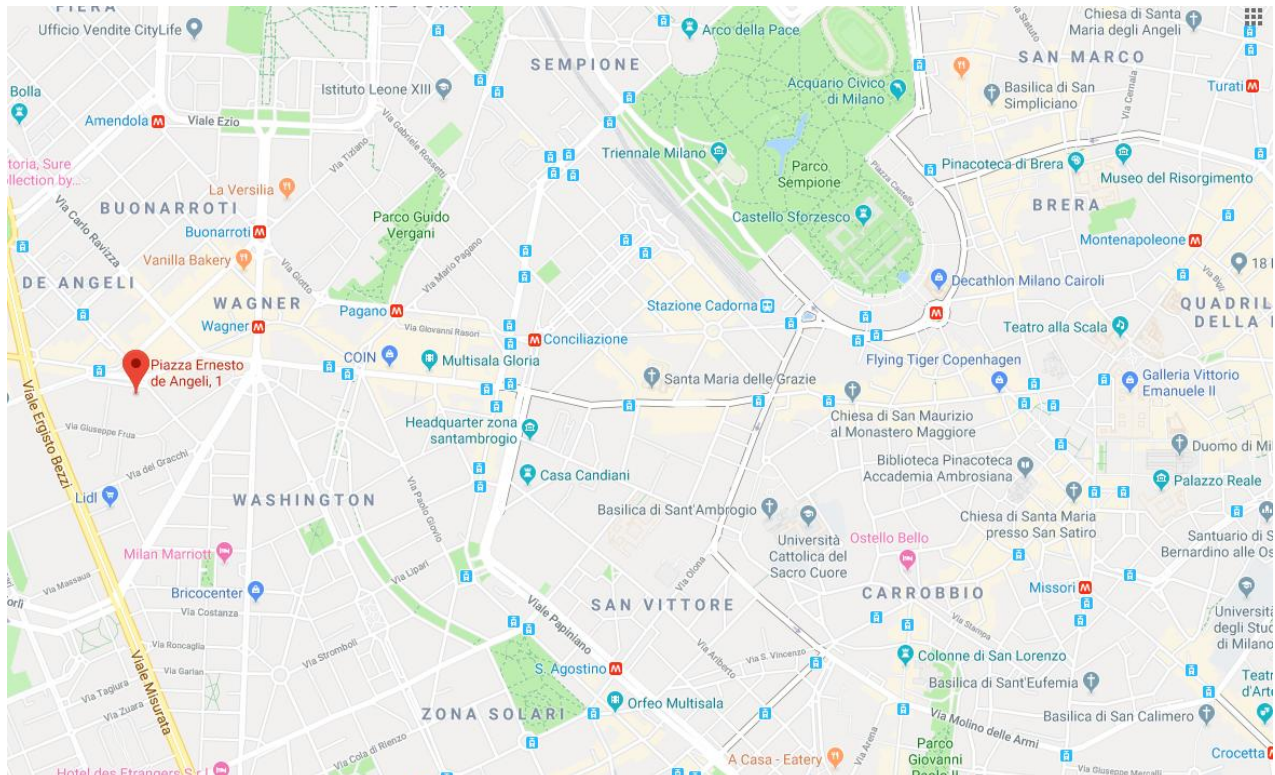

Project Overview

The new Pugliese restaurant is in Piazza De Angeli 1, Milan in the heart of the Marghera-De Angeli district. Il Mannarino is a real butcher's shop that turns into a restaurant with a kitchen and grill on sight. The restaurant has two floors and 65 seats. There is the possibility of enjoying Italian meat dishes cooked on the spot by a team of professional chefs. They offer a typical homemade cuisine that does not include any fixed menu: it is the guest who directly chooses what to eat from the counter among the best cuts of meat available, ready to be cooked at will. The project was derived from the idea of three talented millennials Luca, Filippo and Gianmarco: the project is to expand on the city of Milan (two new openings planned for 2020), but also on the national territory and even in London and in the United States.

Juventus Flagship Milan

Project Overview

Juventus has inaugurated the new Flagship Store in Milan in Corso Matteotti 8, one of the main shopping streets. This is the fifth store in Italy, and the Chief Revenue Officer, Giorgio Ricci said they will have an opening every year over the next five years. This flagship store has an exhibition space totaling 320 square meters on two floors, revisiting the Juventus identity on High Street and is represented in the industrial minimal design typical of the Juventus store. The winning cups are displayed in the center of the first floor, and the design and lighting are the main characters of the facade.
