

[June 28-30, 2023] GARDE's New Business Exhibits at Metaverse Expo

Under the concept of "infinite creation, one technology, into the unknown," GARDE has launched its new metaverse business in 2023. Leveraging our extensive network across various business sectors and our expertise in providing sophisticated designs cultivated over the years, we aspire to deliver metaverse spaces crafted by our top-tier architects that will distinguish us within the industry.

During the exhibition, visitors will have the opportunity to immerse themselves in COCO WARP, a metaverse museum designed and produced by GARDE and operated by Aoyama Design Forum. GARDE's team has integrated cutting-edge visual effects technology, voice technology, chat functions, and avatar technology to bring to life a metaverse space based on authentic museum design blueprints. The objective was to create a more captivating and scalable metaverse environment.
